Relevant Courses: UI Design, Web Design, Systems Programming, Game Programming, System Modelling and Simulation

TECHNICAL SKILLS

Programming Languages: HTML, CSS, JavaScript, C, Bootstrap

Tools and Technologies: Adobe Suite, Figma, Git, Docker

PROFESSIONAL EXPERIENCE

Front End Developer | Emumba | Santa Clara, CA   **June 2023 - August 2023**
- Developed and optimized interactive user interfaces for web applications, improving user experience
- Utilized HTML, CSS, and JavaScript to build and refine web applications, ensuring seamless functionality and design.
- Worked closely with a team to troubleshoot issues, implement enhancements, and meet project deadlines.
- Enhanced website performances by implementing responsive designs
- Demonstrated a commitment to continuous learning and skill development by actively participating in problem-solving and algorithmic challenges and staying updated on industry best practices.

Volunteer - Vendor & Volunteer Management | MuslimFest | Mississauga, ON   **July 2017 - July 2025**
- Coordinated vendor logistics, ensuring smooth setup and operations for for 100+ vendors at a large-scale festival with 500,000+ yearly attendees
- Served as a point of contact for vendors, addressing inquiries, resolving issues, and ensuring compliance with festival guidelines
- Assisted in organizing vendor layouts, managing space allocations, and optimizing foot traffic for maximum engagement.
- Supervised and guided volunteers assigned to vendor support, delegating tasts to maintain efficiency and smooth event execution
- Facilitated communication between vendors, festival organizers, and volunteers to enhance overall event coordination.
- Ensured vendor booths met safety protocols and operational standards, working closely with event staff to resolve logistical challenges

PROJECTS

Personal Portfolio Website (HTML, CSS, JavaScript)
- Designed a fully responsive portfolio website to showcase projects and skills.
- Implemented interactive elements and modern UI/UX principles to create a visually appealing and user-friendly experience.
- Currently working on improvements to the design and functionality, and making it more detailed and informative

Stopwatch Web App (HTML, CSS, JavaScript)
- Built a simple interactive stopwatch according to a specific criterion
- Focused on creating an intuitive user interface and optimizing usability. Exploring additional features such as lap tracking to enhance performance.

Client Websites
- Developed personalized websites for clients based on their specific requirements, ensuring user-friendly navigation and tailored content presentation.
- Managed end-to-end development, from wireframing to deployment.
